

Introducing Telehealth Treatment Options

Physical Therapy service is one of the essential healthcare services that has been permitted and encouraged to continue to operate during our “stay at home” order. This keeps patients healthy and out of hospitals and emergency rooms that cannot currently handle that capacity. While our practice remains open, we are proud to offer Telehealth to treat your pain or injury.

We are now providing virtual visits that will allow you to have your condition assessed and treated from the comfort of your own home. This is done through a secure, online, one on one video chat with Cara or Dora. It's easy, user friendly, and uses your smartphone or a computer with a camera. We are also offering phone visits as another option. Whichever option you choose, Telehealth works great! We want you to know we are here for you so if you are interested in Telehealth, please call today!
